15th March 2024

Dear Parents/Carers

I hope this letter finds you well. As you may know, this week we celebrated Science Week here at our school, and I wanted to take a moment to share some exciting news with you.

To mark the occasion and to end a fantastic week, we have created our very own Science Scavenger Hunt! This fun activity gives your child the opportunity to explore the wonders of science while also competing for a chance to win a fantastic science hamper. The Scavenger Hunt can be completed during the upcoming Easter break or beforehand. If possible, we kindly request that you take pictures of your child participating in the activity and send them to Chrissy at bursar@newburgh.lancs.sch.uk.

Throughout Science Week, we focused on the concept of time and its impact on the world, both positively and negatively. We were fortunate to have some wonderful guest speakers, including parents, who shared their knowledge and expertise with our students. We extend our heartfelt thanks to them for their time and commitment to inspiring our young scientists.

Another highlight of the week was our Science Fair, which showcased all things STEM (Science, Technology, Engineering, and Mathematics). I would like to extend a special thanks to Year 6 for their invaluable contribution to the event. Their dedication to manning the various stations and engaging our students was truly commendable.

To promote STEM learning further, we have added links to our school website under the Science section. These resources are designed to support home activities and provide additional learning opportunities for your child. I encourage you to explore these materials and engage in science-related activities together as a family.

Once again, I want to express my gratitude for your continued support in fostering a love for science among our students. It is through collaborative efforts such as these that we can inspire the next generation of scientists, innovators, and problem solvers.

Yours sincerely,

Mrs Standrell

Science Lead
